

Lycopod surveys

Lycopods – Clubmosses

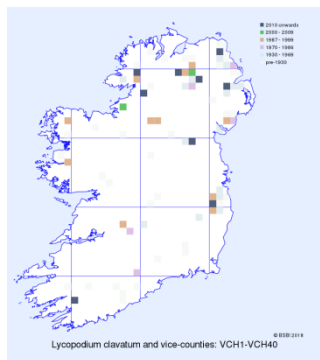

- Family: Lycopodiaceae
- How many spp Irl? – five native
- Why surveying?
 - listed for protection under Annex V of the EU Habitats Directive
 - provide focus for some outings, incl. ‘rough crew’
 - always in nice habitats, so collect other good records too

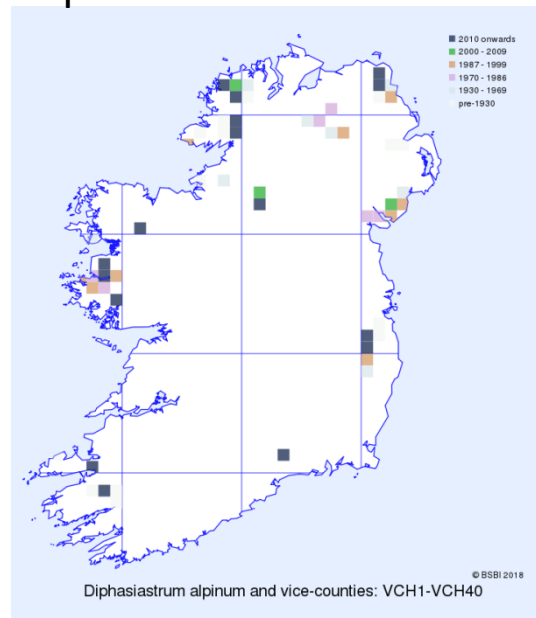

Huperzia selago, Fir clubmoss (Crúibíní sionnaigh)

Lycopodiella inundata, Marsh clubmoss, FPO, RL = VU

Lycopodium clavatum, Stag's-horn clubmoss

Diphasiastrum alpinum,
Alpine clubmoss

Results of the surveys

How many? Which year? which species?

2015	D. alpinum	2	
	L. clavatum	1	
	H. selago	6	
2016	D. alpinum	6	(1 null)
	L. clavatum	3	(1 null)
	H. selago	17	(3 null)
	L. inundata	5	(2 null, 1 error)
2017	D. alpinum	1	
	L. clavatum	3	
	H. selago	11	
	L. inundata	3	(2 null)
