This third edition of the Brecknock Rare Plant Register is substantially updated and covers plants known to be established in the County in the period from 2000 to the present day.

John Crellin, Hay-on-Wye, January 2021

Printed by Power Print, Llandrindod Wells. I am grateful to the Brecon Beacons National Park Authority for funding this printed edition.

Introduction

I learnt a lot preparing the first Rare Plant Register for Brecknock, one of the main things being that there is no possibility of it being anything other than a work in progress.

The work presented here is mine as are the errors and any typos. Mike Porter, the other Joint Recorder with vastly more experience than myself, has helped and guided me greatly in understanding the county flora.

Changes for this edition

As with the previous edition the “Scarce” (section 2) category is limited to species with 10 sites in the county or less – unless listed as under threat nationally or in Britain and Ireland.

This edition reports only those species seen in the county since 2000. The year 2020 has been a surprisingly good one for finding rare species and the timespan covered by this document is 21 years.

The structure of the RPR

Data comes from the BSBI¹ Distribution Database plus my own database for those not yet submitted to the BSBI. Many of these records were digitised by BIS². In addition, many records now come from the various iRecord³ recording systems, in particular the LERC Wales recording app. There are also some records used in compiling this RPR that originated on the WIRED (for BIS) and SEWBRReCORD (for SEWBRReC⁴) online platforms. These are used with the organisations’ permission.

All records for the vice county have been analysed and divided into several sections, the first two of which comprise the core Rare Plant Register. The other sections are primarily of use within the county for analysing the wider recording results and make it possible to find a plant that might have been expected to be in the main document. All sections are available to anyone who submits a reasonable request for access but the RPR in printed form will have only sections 1 and 2 (the rare native and archaeophyte species that are established in the wild in the UK).

This edition of the VC42 Rare Plant Register make use of data available in December 2020.

Maps

Distribution maps of every taxon in sections 1 to 11 are available in electronic form. See the maps on the Internet at bit.ly/vc42maps.

Sections

As well as a site analysis for the county this RPR has used the threat designations in the following lists:

Welsh Red Data List	A Vascular Plant Red Data List for Wales. Rhestr o Blanhigion Fasgwlaidd Data Coch ar gyfer Cymru. Dr Trevor Dines. 2008, Plantlife Wales.
GB Red Data	The Vascular Plant Red Data List for Great Britain - 2005 Cheffings, C. and Farrell, L. (Editors) (including Waiting and Parking lists)
Welsh Section 42	Natural Environment and Rural Communities (NERC) Act 2006. - Species of Principal Importance in Wales (section 42).
National Status (Rare or Scarce)	JNCC ⁵ , Nationally Scarce and Rare Species.

Brecknock Vice County

The Vice Counties for botanical recording purposes were established in the mid-Victorian era and hence followed county boundaries as they then were. The BSBI¹ has continued to use these boundaries to the present day. Hence the area covered is larger than the Brecknock district of Powys. Some effort has been made to be clear about the modern authority applying to the data presented in this edition.

¹ Botanical Society of Britain and Ireland.

² Biodiversity Information Service for Powys & Brecon Beacons National Park.

³ iRecord is operated by the Biological Records Centre (BRC) as part of the work of the UK Centre for Ecology & Hydrology (UKCEH). BRC is supported by the Joint Nature Conservation Committee (JNCC) and UKCEH (through National Capability funding via Natural Environment Research Council (NERC)).

⁴ South East Wales Biodiversity Records Centre.

⁵ Joint Nature Conservation Committee (UK Government).

Brecknock Rare Plant Register sections

Sec	Section	Records shown in print /PDF version ⁶	Publication
1	Species (including hybrids) that are listed in one or more of the lists above in a high threat category and all native or archaeophyte non-hybrid taxa that have 3 sites or fewer). Except that: Hieracium, Taraxacum and apomictic Rubus species are included only if listed.	The most recent records for each site plus the oldest digitised record.	Print / PDF
2	Species with 10 sites or fewer or listed in a lower threat category. Except that: Hieracium, Taraxacum and apomictic Rubus species are included only if listed.	The most recent records for each site plus the oldest digitised record.	Print / PDF
3	Rare hybrids not otherwise listed (3 sites or fewer)	Most recent record for each Site.	PDF
4	Scarce hybrids (10 sites or fewer)	Most recent record for each Site.	PDF
5	Hieracium species	Most recent record for each Site.	PDF
6	Taraxacum species	Most recent record for each Site.	PDF
7	Rubus species	Most recent record for each Site.	PDF
8	Relatively scarce species of interest that are not native or archaeophyte in Brecknock ⁷ .	Most recent record for each Site.	PDF
9	Species that would be in section 1 or 2, but which have not been recorded since 1999.	Most recent record for each Site.	PDF
10	Axiophytes and those plants that have 50 or fewer sites.	Most recent record for each hectad.	PDF
11	Not rare in Brecon. Other Native and Archaeophyte species.	Most recent record for each hectad.	PDF
12	Other hybrids.		
13	Other Neophytes.		
14	Native or Archaeophyte species not recorded since 1999.		
15	Neophyte species not recorded since 1999.		
16	Species that have been omitted from the register. This includes aggregated records and plants not considered to be Native, Archaeophyte or Neophyte. Records for Genus only are omitted entirely and not listed here.		
17	Species that are now listed as extinct.		

The records

As before this document lists monad grid references. The monad quoted is the one for the most recent record in cases where adjacent monad(s) also have part of the population. We feel that most uses of the register only require this level of detail and further information can be obtained via the county recorders or the information providers where it is necessary to do so.

Species names

The names used here are those currently recommended in Stace, *New Flora of the British Isles*, fourth edition. Where these differ from editions two and three, they are indexed (see page 71) under the previous name(s) as well as the latest one. Records themselves reflect the name reported in the record.

⁶ All records are shown in the source spreadsheet apart from section 16 where only one entry is given.

⁷ Mainly neophytes considered to be established but rare or scarce in the VC. In some cases, these are species that are native or archaeophyte in other parts of the country.

Sites

The counting of sites has been done computationally as before and based on the spirit of the “Wells site” concept of a floating kilometre square. It is particularly uncertain how to treat linear sites or the close shore around Llangorse Lake. (About 5.5 km but within the bounds of a 2 km square.) However, review of the results suggests (to me) that the algorithm gets it about right.

Site counts are quoted in the other sections up to 300 (no species passes this number) but it must be said that the method of counting sites probably breaks down at these levels and anything in the 250 – 300 region suggests ubiquity. (Refer to the online distribution maps at bit.ly/vc42maps for a better indication.)

Site naming

Where sites are only known to monad accuracy the “standard” name for the monad is used unless a more precise description is in the record. This is usually the name of the settlement nearest the centre of the monad. This does not necessarily imply the record relates to that property.

Altitude

As data is now readily available for most cases where the grid reference is precise, I have included an estimate of the altitude range for each species based on actual records. The data for these parameters includes that from records made before 2000.

Site Status

At present this RPR indicates, where known, if a site is designated under any of the following categories.

Site of Special Scientific Interest (SSSI).

UK policy requires all SPAs and SACs to be designated as Sites of Special Scientific Interest (SSSIs).

Special Protection Area (SPA)

Sites protected under the EU Birds Directive 1979.

Special Areas for Conservation (SAC)

Sites protected under the EU Habitats Directive 1992.

Important Plant Areas

Areas designated by Plantlife as IPAs which form the focus for much of their conservation work.

National Nature Reserves (NNR).

There are seven National Nature Reserves in the Vice County, managed by Natural Resources Wales.

National Parks

The Brecon Beacons National Park takes up approximately 50% of the Vice County of Brecknock. (A little more than 70% of the park is in the county.) Rather than repeat this information on a high proportion of records, the site information records for locations in the park are shown in green.

Local Nature Reserves (LNR).

Local authorities in Wales have set up Local Nature Reserves.

Wildlife Trust of South and West Wales reserves

Other bodies

Where known, sites on land owned by the National Trust, RSPB, Woodland Trust and Natural Resources Wales are indicated.

Caveat - site status

The information given here cannot be definitive. There may be sites missed which are in designated areas and, in a few cases, records could be indicated to be in a designated site when they are in fact just outside.

Acknowledgements

My recorder colleague, **Mike Porter**, who has had responsibility for botanical recording in Brecknock since 1968, deserves first mention in this list as the person responsible for the lion's share of the records presented and, of course, he has had a significant role in verifying and otherwise checking many of the others.

Mike is also largely responsible for the particularly good coverage of the apomictic genera *Taraxacum* and *Rubus* in the county.

Tim Rich has been responsible for many of the records for two apomictic genera – *Hieracium* and *Sorbus* and has also contributed a considerable number of other rare species records to the Brecknock list. This edition for the first time does include those *Hieracium* species that are listed as scarce or vulnerable. The *Hieracium* analysis presented depends very heavily on the Atlas of British and Irish Hawkweeds, published in 2010 by David McCosh and Tim Rich.

Ray Woods is responsible for a high number of records in this register and has been a great support to our inexperienced new recording group with his wide knowledge of plants both vascular and non-vascular.

The Wildlife Trust of South and West Wales is responsible for many of the records presented as well as for managing many of the reserves where the plants grow and providing advice to landowners at other significant sites.

National Resources Wales manage several important reserves in the county and many records have come from staff.

The full list of recorders who contributed to the data here is very long and I am grateful to all for their contribution to our knowledge of the Brecknock flora.

DMAP written by Dr Alan Morton was used to produce all the distribution maps (www.dmap.co.uk). See the maps at this site: bit.ly/vc42maps.

Sections 1 and 2, Rare and Scarce Plants in Brecknock

Rare, Section 1	Plants with 3 or fewer Sites or listed in a high threat category	Opposite
Scarce, Section 2	Plants with 4 to 10 Sites in the county or listed in a lower threat category	Page 41

These sections show native or archaeophyte species with well-substantiated sites in the Vice County and those that are listed in one of the Red Data Lists (GB or Wales) as threatened or rare. Those listed in Section 42 (Wales) are also included as are any in the list of Nationally Rare or Scarce species.

The only exceptions are for *Hieracium*, *Taraxacum* and apomictic⁸ *Rubus* species which are included only if listed in the various schedules as above or considered to be vulnerable.

Records

In each case the most recent record for each site identified is shown together with the oldest record available in digital form. (In many cases there will be even older reports / specimens that are not yet available in the DDb.)

The information presented is:

Date; Taxon name as recorded on the database concerned⁹; Monad Grid reference (if available); Site description; Site Status; Source Database.

Site Status

Site information for records that fall within the **Brecon Beacons National Park** is shown in **green**.

Planning area	For Powys, the local planning area (starting "CFA"). For other authorities that are partly in the Vice County area the Authority name
Parish	Equivalent to the local council area
NNR	National Nature Reserve
WTSWW	Wildlife Trust of West and South Wales Reserve
LNR	Local Nature Reserve
SSSI	Sites of Special Scientific Interest
SPA	Special Protection Areas
SAC	Special Areas for Conservation
IPA	Plantlife Important Plant Areas
NT	Land owned by the National Trust
RSPB	One Reserve in the county - Carngafallt
WT	Woods owned by the Woodland Trust
	National Resources Wales Forestry

See the index on page 83 for the full name of the designated site.

⁸ *Rubus* subgenera 1 to 5 in Stace are included where they qualify – eg *Rubus saxatilis*.

⁹ This is to ensure that the decisions I have taken over interpretation of older names and the way to treat sub-species may be understood and criticised or corrected.

As this species has been segregated in recent years, older records may refer to other taxa. In Brecknockshire two new species, *S. cambrensis* and *S. stenophylla*, have been split off and there are other "unusual" specimens that are currently unresolved. All the records reported below are believed to be of the species sens. strict.

Brecknockshire Rare Plant Register

WTSWW103	Wern Plemys
WTSWW104	Pen y Waun
WTSWW105	Trewalkin Meadow
WTSWW106	Drostre Wood
WTSWW107	Cae Eglwys
WTSWW108	Cae Lynden
WTSWW109	Ystradfawr
WTSWW110	Craig y Rhiwarth
WTSWW111	Allt Rhongyr

Local Nature Reserves

LNR04	Beaufort Hills Pond and Woodland
LNR22	Cwm Taf Fechan Woodlands
LNR64	Parc Bryn Bach
LNR65	Parc Nant-y-Waun
LNR77	Talybont Reservoir

Sites of Special Scientific Interest

SSSI0009	Abercriban Quarries
SSSI0018	Afon Irfon
SSSI0020	Afon Llynfi
SSSI0023	Alexanderstone Meadows
SSSI0024	Allt Cynhelyg
SSSI0031	Allt-y-Gest
SSSI0045	Baltic and Tyle'r-bont Quarries
SSSI0064	Black Mountains
SSSI0068	Blaen Cilieni
SSSI0069	Blaen Nedd
SSSI0075	Boxbush Meadows
SSSI0077	Brechfa Pool

SSSI0078	Brecon Beacons
SSSI0098	Bryn-Bwch
SSSI0102	Brynmawr Sections
SSSI0104	Buckland Coach House & Ice House
SSSI0116	Cae Bryn-Tywarch
SSSI0119	Cae Comin Coch
SSSI0124	Cae Gwernllertai
SSSI0130	Cae Penmaes
SSSI0131	Cae Pwll-y-bo
SSSI0141	Caeau Bronydd-Mawr
SSSI0149	Caeau Cnwch a Ty'n-y-graig
SSSI0153	Caeau Cwmcynant (Caeau Cwncaenant)
SSSI0154	Caeau Fferm
SSSI0160	Caeau Llwyn Gwrgan
SSSI0163	Caeau Nant y Llechau
SSSI0172	Caeau Ton-y-fildre
SSSI0174	Caeau Ty'n-llwyni
SSSI0175	Caeau Ty-mawr
SSSI0183	Carn Gafallt
SSSI0193	Cathedine Common Wood
SSSI0242	Coed Blaen-y-cwm (Blaen-y-cwm Wood)
SSSI0256	Coed Dyrysiog
SSSI0269	Coed Mawr - Blaen-car
SSSI0274	Coed Nant Menascin
SSSI0287	Coed y Ciliau
SSSI0294	Coed Ynys-Faen
SSSI0332	Cors Bryn-y-Gaer
SSSI0376	Craig y Rhiwarth
SSSI0398	Cwar yr Ystrad a Cwar Blaen Dyffryn
SSSI0401	Cwm Cadlan
SSSI0402	Cwm Clydach
SSSI0404	Cwm Craig-ddu Quarry
SSSI0420	Cwm Taf Fechan Woodlands
SSSI0421	Cwm Twrch
SSSI0431	Daren Fach
SSSI0447	Drostre Bank
SSSI0448	Duhonw
SSSI0451	Dyffrynoedd Nedd a Melte a Moel Penderyn
SSSI0458	Elenydd
SSSI0460	Erwood Dingle
SSSI0494	Garth Bank Quarry
SSSI0499	Gilwern Hill
SSSI0515	Gorsllwyn; Onllwyn
SSSI0556	Gweunydd Dyffryn Nedd
SSSI0572	Gyfartha
SSSI0574	Halfway Quarry
SSSI0579	Hen-Allt Common
SSSI0584	Heol Senni Quarry
SSSI0592	Illtyd Pools

Woodland Trust

WT007	Coed Dolifor
WT021	Park Wood
WT029	Abertreweren
WT035	Rook Wood
WT047	Coed y Ciliau
WT069	Coed Cefn
WT093	Coed Glyn Gwennws
WT104	Coed Dyfodol Sarnau

Database source codes

The bulk of records are from the BSBI DDb, indicated by “DB”. Additional records held by JRC and not yet uploaded to the DDb are indicated by “JC”. Some records for 2020 have come directly from iRecord and are designated “IR”.

A superscript code indicates the compiling source of the data - not the actual recorder which is listed in the RPR spreadsheet.

Superscript Code	Source
1	John Crellin's records compiled from local recorders and directly submitted records. Includes Mike Porter's records since 2015.
2	Mike Porter's records since the 1960s digitized by BIS in 2015.
3	Other BIS records
4	Data submitted via MapMate
5	Data submitted via the BIS LERC App
6	Threatened Plants Project
7	CCW records (now National Resources Wales)
8	BSBI New Year Plant Hunt records
9	iRecord records
10	Other records submitted via Indicia
11	Charophyte records from various specialist sources.
12	Kew Millennium Seed Bank records
13	Orchid Observers (Kew)
14	National Resources Wales / ENSIS Ltd Lake Surveys
15	Rubus Records
16	Taraxacum database
17	Welsh Plant Records (Welsh Bulletin)
18	Plantlife records
19	Euphrasia Records from Chris Metherell
20	Hieracium data from David McCosh
21	New Journal of Botany Plant Records 2011
22	Records used for maps in BSBI Sorbus handbook
23	Expertly determined records of Rosa
24	Vascular Plant records published in Watsonia
25	Various hybrid record sources
26	UK Centre for Ecology & Hydrology Higher Level Stewardship Surveys
27	Records from the BSBI Local Change database (2002-2004)
Higher	Higher numbers refer to sources for data before 2000.
