Acknowledgements

My thanks go to John Crellin VCR Brecknock VC42 for all his help in formatting the original spreadsheet.

I should like to acknowledge with gratitude a financial contribution towards the printing costs from a BSBI member who wishes to remain anonymous.

Thanks also go to COFNOD Local Records Centre for their support and permission to use some of their records for use in this Register.

I should also like to thank all those many recorders who so kindly send me so many records and whose contribution is so very much appreciated and valued.

Introduction

This is the third version of a Rare Plant Register for Denbighshire VC50. It shows records taken from 2000 to 2020 and up until June 2021.

It is not of course, and never will be, complete and despite our many thousands of records and reasonably good coverage of the vice-county it remains but a snapshot in time. The map following shows the number of taxa recorded in each tetrad (2 km square) between 2000 and June 2020. (A. Amphlett, BSBI 2020) Very few tetrads were not visited at all, the vast majority at least twice. Low taxon numbers relate to habitat, generally upland and moorland areas rather than low recorder effort. Decent coverage means a better chance of establishing the rarer and scarcer plants. It also means the 'near scarce' can be elicited (see Table 4) – taxa whose distribution might benefit from monitoring. Some of these have a national rarity status (see Table 5)

Data derive from the Botanical Society of Britain and Ireland (BSBI)'s main distribution database and COFNOD LRC.

All versions follow on from my predecessor Jean A. Green's book '*The Flowering Plants and Ferns of Denbighshire*' (2006, Countryside Council for Wales). This is a plant list and was the first to be published for Denbighshire VC50. At the time of writing there has been no flora published for Denbighshire.

The Register includes native and archaeophyte taxa which have international or national rarity status, irrespective of their rarity in Denbighshire, as well as plants that are locally rare, scarce or near scarce (**LR**, **LS**, **LNS**). Archaeophytes are plants known or suspected to have been introduced before Medieval times.

The critical taxa *Hieracium*, *Rubus* and *Taraxacum* are undoubtedly under-recorded but included nevertheless and with particular thanks to their expert recorders and determiners. Native hybrids are included out of interest.

Criteria for inclusion and the format follow 'County Rare Plant Register Guidelines' BSBI (2017)

Summary tables show:

Table 1: First reason for inclusion in the Register

1. International
2. GB Red List (Cheffings and Farrell, 2005)
3. Welsh Red List (Dines, 2008)
4. Section 42 (NERC Act, 2006): Welsh Priority species
5. GB Rare (found in 1 – 15 10km squares in Britain) and GB Scarce (16 – 100 km squares in Britain)
6. Rare or Threatened Arable plants or on Plantlife's list of Important Arable Pant Areas (IAPA)

Table 2: Locally Rare **LR** (found in 1 – 3 1km square sites)

Table 3: Locally Scarce **LS** (found in 4 – 10 1km square sites)

Table 4: Locally Near Scarce **LNS** (found in 11 – 30 1km square sites)

The Register:

Taxon names

Scientific and English nomenclature follows '*New Flora of the British Isles*' Clive Stace (4th edition published C&M Floristics 2019). Welsh usage derives from '*Planhigion Blodeuol, Conwydd a Rhedyn*' (Cymdeithas Edward Llwyd 2003)

Records are shown in monad (1 km square) order.

Rarity Status

Noted are records of taxa which are:

Wales Red List (**see also Table 1**)

International status (**see also Table 1**)

LR - Locally Rare: present in 1 -3 1km square sites in the VC (**see also Table 2**)

LS - Locally Scarce: present in 4 – 10 1km square sites in the VC (**see also Table 3**)

Nationally Rare/Scarce in GB (**see also Table 1**)

National Red List in GB (**see also Table 1**)

Section 42 (**see also Table 1**)

IAPA – Rare or Threatened Arable plants or plants indicative of an Important Arable Plants Area

Native/Archaeophyte

All native taxa are included, but only in locations where they are believed to be native (i.e. not planted e.g. seed mixes, popular and frequent nowadays). They are included if there is uncertainty.

Site

For the most part, place names are taken from the most obvious feature in the 1km square as shown on O.S. maps 1:25 000 scale. The Comments field may elaborate further.

Most 1km squares have a unique name. The Gazetteer (**Tables 8 & 9**) lists 1km squares against place names and vice versa.

Grid Ref

Grid references are shown to maximum available resolution.

Date

Dates show the date of the last record. These very often do not show nor therefore acknowledge the original recorder.

The date of the first record if digitised is shown in italics if before 2000.

Initial

Recorders' names are listed in full in **Table 10**

Comment

Comments describe abundance, habitat or place name as available.

Protection

Records taken from within the protected sites of Sites of Special Scientific Interest (SSSI), National Nature Reserves (NNR) and Local Nature Reserves (LNR) are shown. These may not be completely accurate as it can be difficult to match boundaries.

Table 7 shows the names of the Sites.

Cyflwyniad

Dyma'r trydydd fersiwn o'r Gofrestr Planhigion Prin ar gyfer Sir Ddinbych VC50. Mae'n dangos y cofnodion a gymerwyd o 2000 hyd 2020 a hyd at mis Mehefin 2021.

Wrth gwrs, nid ydyw, ac ni fydd byth yn gyflawn, ac er gwaethaf ein miloedd o gofnodion a'n harchwiliad gweddol dda o'r is-sir (vc), nid yw'n llawer mwy na chip-olwg. Mae'r Map yn dangos y nifer o'r tacsonau a gofnodwyd ym mhob tetrad (sgwâr 2km) rhwng 2000 a Mehefin 2020. (A. Amphlett, BSBI 2020). Ychydig iawn o'r tetradau na chawsant ymweliad o gwbl, a buom yn y rhan fwyaf o leiaf ddwywaith. Mae rhifau isel yn adlewyrchu'r cynefin – rhostir a thir uchel fel rheol, yn hytrach nag diffyg ymdrech gan y cofnodwr. Mae archwiliad da yn debycach o ddangos y planhigion prin neu weddol brin. Mae hefyd yn golygu a gellir lleoli'r planhigion sydd 'bron yn brin' (*near scarce*) (gweler Tabl 4) – y tacsonau y byddai'n dda monitro eu lleoliad. Mae gan rhai ohonynt statws prinder genedlaethol (gweler Tabl 5).

Ceir y wybodaeth oddi wrth bâs data Cymdeithas Fotanegol Prydain ac Iwerddon (BSBI) a COFNOD (Canolfan Cofnodion Lleol).

Mae pob fersiwn o'r Gofrestr yn dilyn llyfr fy rhagflaenydd Jean A. Green *The Flowering Plants and Ferns of Denbighshire* (2006 Cyngor Cefn Gwlad Cymru), sef rhestr o blanhigion y sir, a'r gyntaf ar gyfer Sir Ddinbych VC50. Hyd yma ni chyhoeddwyd fflora ar gyfer Sir Ddinbych.

Mae'r Gofrestr hon yn cynnwys tacsonau cynhenid ac archeoffytau, sydd o statws prin yn rhyngwladol neu'n genedlaethol, beth bynag fo eu statws yn Sir Ddinbych, yn ogystal â'r planhigion a ystyrir yn brin, anghyffredin neu yn lled brin (**LR,LS, LNS**). Archeoffytau yw'r planhigion y gwyddom neu yr amheuw'n iddynt gyrraedd y wlad hon cyn y cyfnod Canol Oesol. (Medieval).

Er bod y planhigion anodd *Hieracium*, *Rubus* a *Taraxacum* heb eu cofnodi'n llawn, rydym wedi eu cynnwys, gan ddiolch yn arbennig i'r arbenigwyr sydd wedi eu nodi a'u hadnabod. Mae'r croes-rywogaethau (hybrid) cynhenid wedi eu cynnwys o ran diddordeb.

Mae'r fformat, a'r canllawiau ynglŷn â beth i'w gynnwys yn dilyn 'County Rare Plant Register Guidelines' BSBI (2017).

Dengys y **Tablau Crynodeb** :

Y Gofrestr

Enwau Tacsonau

Mae'r enwau Gwyddonol a Saesneg yn dilyn '*New Flora of the British Isles*' Clive Stace (4ydd argraffiad C&M Floristics 2019). Mae'r enwau Cymraeg yn dilyn '*Planhigion Blodeuol, Conwydd a Rhedyn*' (Cymdeithas Edward Llwyd 2003)

Dangosir y cofnodion yn nhrefn y monadau (sgwâr 1km)

Statws Prinder

Telir sylw o'r tacsonau sydd :

Ar Restr Goch Cymru (gweler hefyd Tabl 1)

Statws Rhyngenedlaethol (gweler hefyd Tabl 1)

LR – Prin yn Lleol: mewn safleoedd 1-3 sgwâr 1km yn yr is-sir (VC) (gweler hefyd Tabl 2)

LS – Anghyffredin yn Lleol: mewn safleoedd 4-10 sgwâr yn yr is-sir (VC) (gweler hefyd Tabl 3)

Yn Brin/Anghyffredin ym Mhrydain (gweler hefyd Tabl 1)

Ar y Rhestr Goch Genedlaethol ym Mhrydain (gweler hefyd Tabl 1)

Yn Adran 42 (gweler hefyd Tabl 1)

IAPA – Planhigion Tir Âr sy'n Brin neu'n Anghyffredin, neu planhigion sy'n nodweddiadol o Ardal o Blanhigion Tir Âr Pwysig

Cynhenid / Archaeoffytau

Cynhwysir pob tacson cynhenid, ond dim ond yn y lleoliadau lle credir eu bod yn gynhenid (h.y. heb fod wedi eu planu e.e. cymysgedd o hadau, sy'n gyffredin bellach). Os oes ansicrwydd, fe'u cynhwysir.

Safle

Fel arfer, cymerir yr enw oddi ar y nodwedd amlycaf yn y monad (sgwâr 1km) ar y map O.S. graddfa 1:25 000. Weithiau ceir mwy o fanylion yn y sylwadau.

Mae gan y rhan fwyaf o'r monadau enw unigryw. Mae'r Gazetteer (Mynegai Daearyddol) (Tablau 8 a 9) yn rhestru enwau monad yn erbyn enwau lleoedd, ac i'r gwrthwyneb (vice versa).

Cyfeirnodau Grid

Dangosir y cyfeirnodau grid i'r manylrwydd gorau sydd ar gael.

Dyddiad

Mae'r dydyddiad yn cyfeirio at y cofnod diweddaraf. Yn aml iawn nid yw'r rhain yn dangos nac yn cydnabod y cofnodydd gwreiddiol.

Cofnodwyr

Rhoddir enwau llawn y cofnodwyr yn Tabl 10

Sylwadau

Disgrifia'r sylwadau yr amllder, y cynefin neu'r enw

Gwarchodaeth

Dangosir y cofnodion o'r safleoedd dan warchodath – Safleoedd o Ddiddordeb Gwyddonol Arbennig (SSSI), Gwarchodfeydd Natur Cenedlaethol (NNR) a Gwarchodfeydd Natur Lleol (LNR). Gellir fod peth ansicrwydd, oherwydd yr anhawster i gymharu ffiniau.

Dangosir enwau'r safleoedd yn Tabl 7.
