

Identiplant

Plant identification course for beginners in serious botany

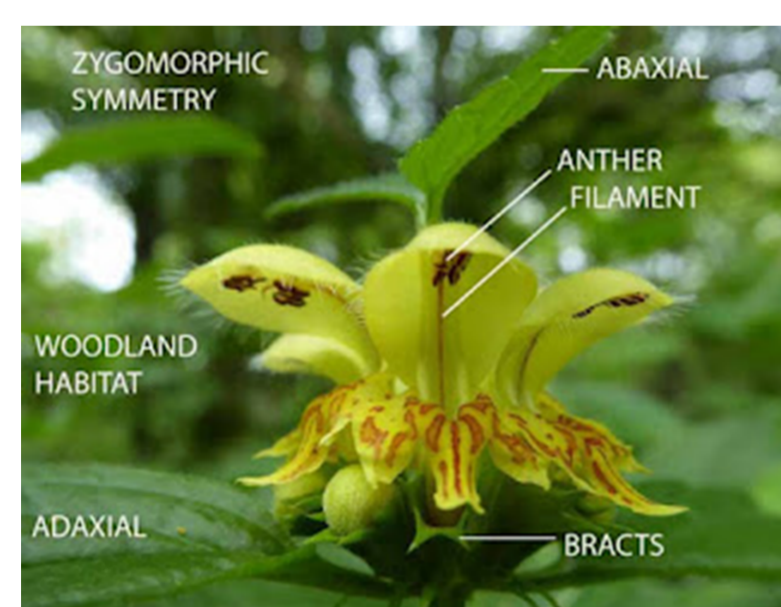

New partnership with TCV to deliver Identiplant in Scotland

Applications open 1 December

The course encourages students to examine common and widespread plant species throughout the growing season.

A UNIQUE ONLINE TUTOR-LED COURSE

- Learn to identify plants from Britain correctly, confidently and accurately
- Learn how to use a Flora and to follow a botanical key
- Learn the diagnostic features of our commonest plants
- Consisting of 15 units completed between Feb and Sept with a single intake annually.
