Rare Plant Registers in Wales

Dr Polly Spencer-Vellacott
BSBI Welsh Officer

Rare Plant Registers in Wales

- What is a Rare Plant?
- What are Rare Plant Registers?
- Why are they useful in recording?
- How do you go about making a Rare Plant Register?
 - How can a Country Officer help?

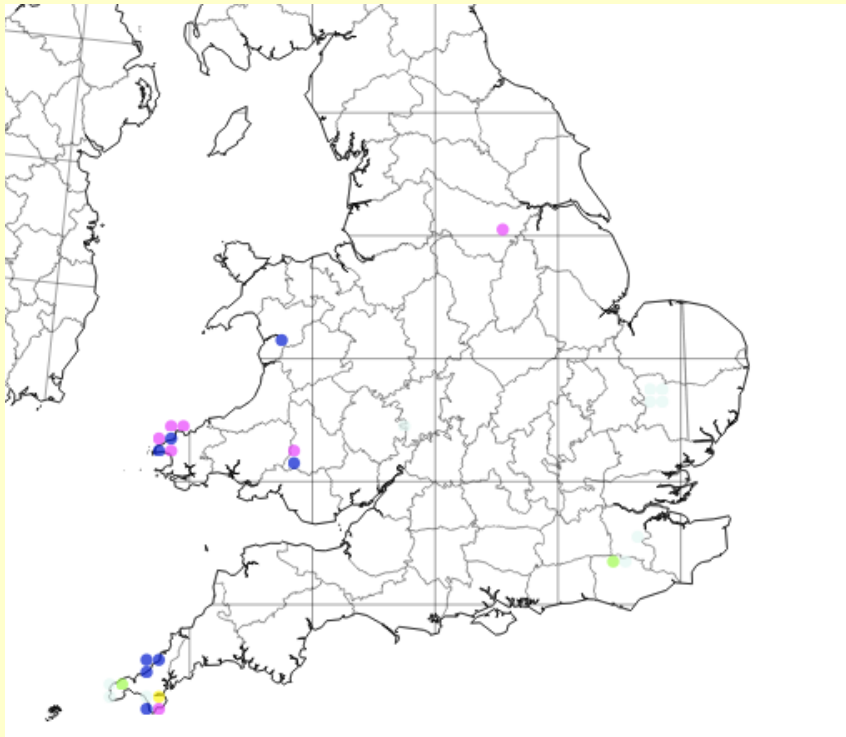

What is a Rare Plant?

Genista pilosa

What is a Rare Plant?

***Genista pilosa*: Nationally Rare**
GB Red list: Near Threatened
Wales Red List: Vulnerable

**Pembrokeshire: Not Locally
Scarce (31 monads)**

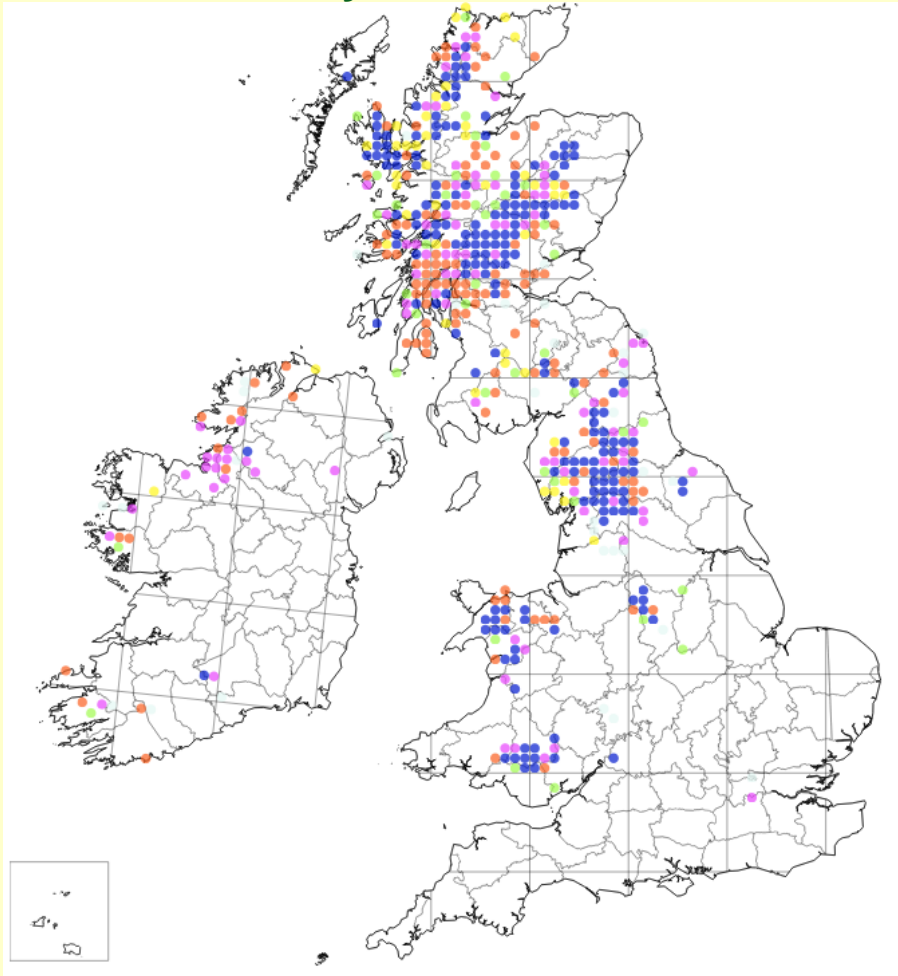

What is a Rare Plant?

Asplenium viride

What is a Rare Plant?

Asplenium viride
Not Nationally Scarce, Least Concern

Monmouthshire: Locally
Rare

What is a Rare Plant Register?

- Details of the sites occupied by Rare Plants in the county – especially Locally Rare - 3 or fewer “sites”
- (also usually includes species with national threat/ scarcity status, and Locally Scarce – ~10 or fewer sites)

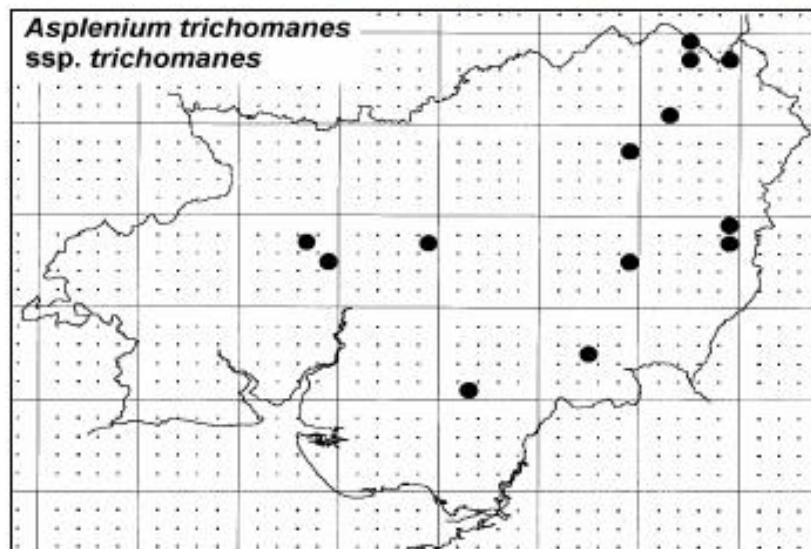

Cardiganshire – 1978 – 2012...

VASCULAR PLANTS

Acer campestre (Field Maple) (Native sites only)	3	593798 594862 600835	2000 2000 2000		Penparcau Wallog Cwm Woods
! Acorus calamus (Sweet Flag)	1	498427	2000		Highmead
Alchemilla filicaulis ssp vestita (Hairy Lady's Mantle)	3	317462 322460 467611 726581	1997 1997 1996 1994	NT	Brongest Brongest Ddol-wen Cwm Berwyn
Alchemilla xanthochlora (Alpine Lady's Mantle)	3	679722 698665 702677	1971 1994 1987		Llanafan Swyddffynnon Ystrad Meurig
! Allium roseum ssp bulbiferum (Rosy Garlic)	2	448612 455617	1999 1996		Henfynyw Aberaeron
! Allium subhirsutum (Hairy Garlic)	1	410588	2000		Gilfachreda
! Allium triquetrum (Three-cornered Leek)	2	387594 598810 599819	2000 1996 2000		New Quay Llanbadarn Fawr Waun Fawr
! Alnus x pubescens (A hybrid Alder)	1	628752	2000		Llanilar

Carmarthenshire – 1984 – 1999...

SN734417	yes	5/4/1988	J & M Iliff and R D Pryce	none	Merchon Valley near Cilycwm: on quarry face in Gala Shales. Det.G Hutchinson 13/3/89, Hb NMW
SN767478	yes	23/10/1997	A O Chater and A C Jermy	SSSI	Allt Rhyd-y-groes: on shaded rock outcrop in east-facing oakwood
c. SN75-48-	yes	3/8/1983	I K Morgan	none	Cribyn Du
SN74Y	yes	1972	Mrs I M Vaughan	none	Ystradffin, Rhandimwyn
SN74Y	yes	1972	Mrs I M Vaughan	none	Rhuddallt, Rhandimwyn

Asperula cynanchica, Pendine Burrows

Asplenium viride Green Spleenwort

SCARCE in vc

No of Wells sites: 10

Probably no change in status since production of 1984 list

Monitoring required

GRID REF	NATIVE	LAST SEEN	RECORDER	PROTECTION	SITE NAME, HABITAT, etc
SN679184	yes	28/6/1997	A O Chater, Jim Bevan, R D Pryce and G Hutchinson	SSSI NP	Pal-y-Cwrt: limestone crags and low cliffs
SN719195 to SN720194	yes	28/6/1997	A O Chater, Jim Bevan, R D Pryce and G Hutchinson	SSSI NP	Clogau Bach: limestone outcrops and old quarries
SN71H	yes	5/1983	G Hutchinson	SSSI NP	Foel Deg

May 2007

Monmouthshire – 2007

Euphrasia nemorosa* x *pseudokernerii - a hybrid Eyebright

National rarity:

Local rarity: 1 Wells site

Grid Ref	Date	Site	Location	Habitat	Number	Threat
ST 466 921	2003		M.o.D. Caerwent (1 of 6 sites)		c.50 plants	

Euphrasia pseudokernerii - An Eyebright

National rarity: Scarce, Red List 'Endangered'

Local rarity: 1 Wells site

Grid Ref	Date	Site	Location	Habitat	Number	Threat
ST 47 91	2003	None	S.of Little Dinham Wood	turf over Carboniferous Limestone	c.30 plants	

Euphrasia scottica - An Eyebright

National rarity:

Local rarity: 1 Wells site

Grid Ref	Date	Site	Location	Habitat	Number	Threat
ST 24 92	1986		Twmbarlwm	wettish area, S.W. side	1-5 plants	

Festuca altissima - Wood fescue

National rarity:

Local rarity: 5 (1) Wells sites

Grid Ref	Date	Site	Location	Habitat	Number	Threat
SO 544 139	1905	AONB	N.of Suckstone	woodland.	1000+ plants	

Shropshire – 3rd edition 2005...

Frank Perring found it in 1975, where it Wigginton (1979), Walker (1987-1992) and Perring again (1993). Walker added Marton Pool, Chirbury (SJ2902) to the site list in 1988. In 1990 Pat Parker and Jane Ing found it in Walford Pool (SJ4320), where it had apparently been introduced with other rare water plants, and where it persisted until 1991.

Callitriche hermaphroditica

Campanula patula L.
Spreading Bellflower
Native. Scarce.

The natural habitat of this plant is woodland edge alongside rivers. It is also found on hedgebanks along quiet lanes. It is Nationally Scarce and declining in Britain, with just 37 dots in the New Atlas. In Britain it is almost entirely restricted to the catchment of the River

Why are Rare Plant Registers useful?

- Interesting for Vice-County Recorder – allows them to value rare species objectively
- Recording – suggests areas to target
- Planning – locally rare species may be listed separately
- Conservation – allows those working in conservation to locate most important local species

Use in GIS

- Conservation professionals e.g. Natural England, Natural Resources Wales, Local Government Ecologists, etc. etc....
- (and you too if you have the desire, and will to learn a new computer program)
- Display in Arc/ MapInfo/ QGIS – over maps or aerial photographs

Examples of RPR data

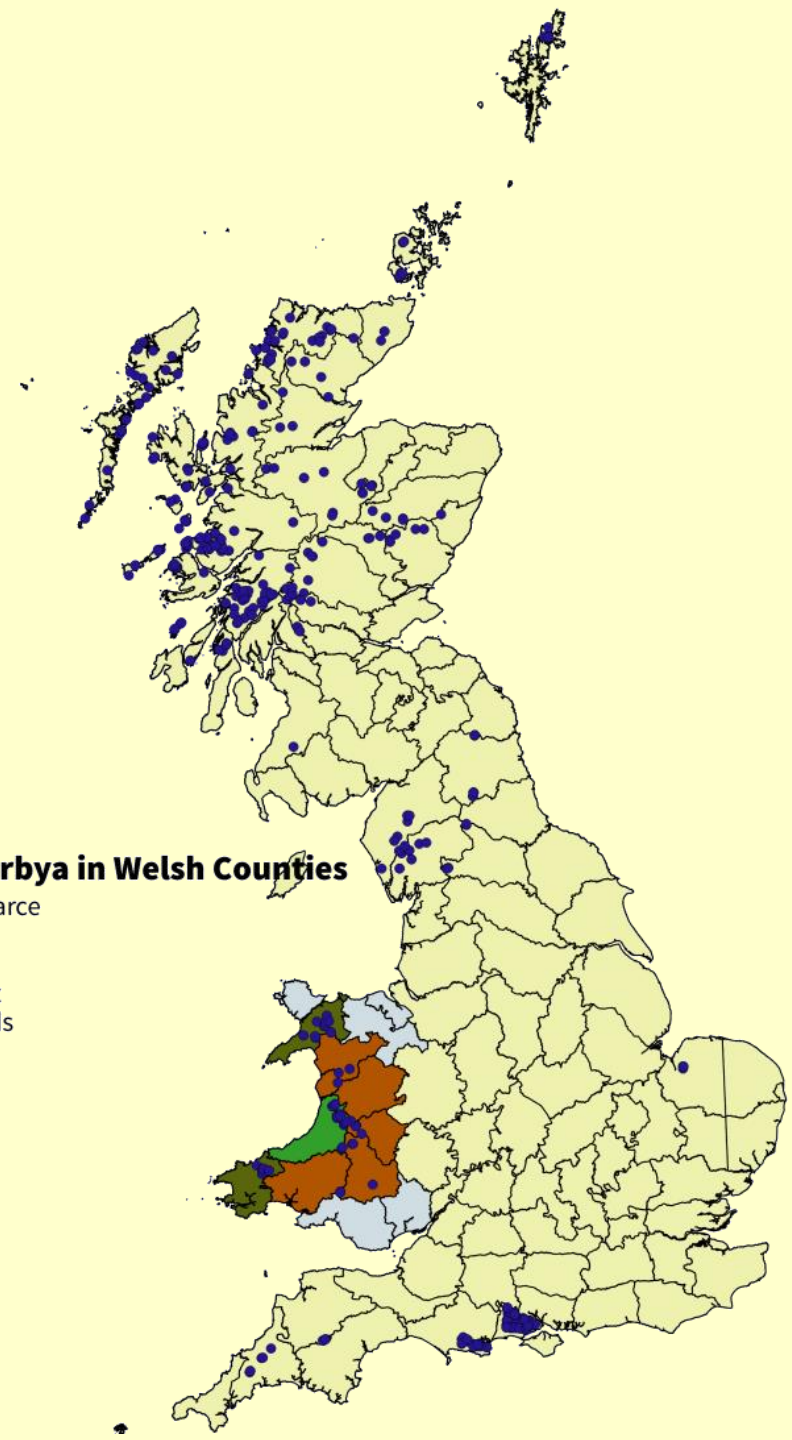

- *Hammarbya paludosa*
- Western distribution in GB (LC in GB Red List but EN in Wales)
- Not scarce in Cardiganshire
- Scarce in Pembrokeshire and Caernarvonshire
- Rare in Merionethshire, Monmouthshire (discovered 2015!), Radnorshire, Breconshire and Carmarthenshire
- Absent from other counties

Examples of RPR data

- *Hammarbya paludosa*
- Western distribution in GB (LC in GB Red List but EN in Wales, VU in England)
- Not scarce in Cardiganshire
- Scarce in Pembrokeshire and Caernarvonshire
- Rare in Merionethshire, Monmouthshire (discovered 2015!), Radnorshire, Breconshire and Carmarthenshire
- Absent from other counties

Hammarbya in Welsh Counties

Examples of RPR data

- *Hammarbya paludosa*
- Western distribution in GB (LC in GB Red List but EN in Wales, VU in England)
- Not scarce in Cardiganshire
- Scarce in Pembrokeshire and Caernarvonshire
- Rare in Merionethshire, Monmouthshire (discovered 2015!), Radnorshire, Breconshire and Carmarthenshire
- Absent from other counties

How to make a Rare Plant Register?

1. Create a species list
2. Add information for each species
3. Create a spreadsheet of sites
4. Format a printable version

Create a species list

- Spreadsheets available from Andy Amphlett – allow download and selection according to varying criteria from DDB; automate first draft list (based on number of tetrads/ monads)
- Add species of national importance (Red Data Books, Nationally Rare/ Scarce)
- Review list using local knowledge (may for example exclude *Taraxacum/ Hieracium/ Rubus*)

File Home Insert Page Layout Formulas Data Review View Developer Add-Ins

266	Carex acuta	NATIVE	Scarce	
270	Carex acuta x elata = C. x prolixa	NATIVE	Last recorded 1904	
273	Carex acuta x nigra	NATIVE	Last recorded 1904	
274	Carex diandra	NATIVE	Last recorded 1950	
275	Carex dioica	NATIVE	Rare	
276	Carex divisa	NATIVE	Rare	Check
277	Carex elata	NATIVE	Scarce	Check
278	Carex elata x nigra = C. x turfosa	NATIVE	Last recorded 1904	
282	Carex limosa	NATIVE	Rare	
283	Carex muricata	NATIVE	Scarce	
286	Carex muricata	NATIVE	Last recorded 1970Scarce	
289	Carex oederi	NATIVE	Scarce	Check
291	Carex otrubae x remota = C. x pseudoaxillaris	NATIVE	Rare	
292	Carex paniculata x remota = C. x boeninghausiana	NATIVE	Rare	
293	Carex rostrata x vesicaria = C. x involuta	NATIVE	Last recorded 1927	

Add information for each species

- Could include:
 - Historical information (first county record, sites where not found since 19XX)
 - Local views (apparently declining in the county, widely planted in wildflower mixes, etc.)
 - General species account – may be available centrally

Create a spreadsheet of sites

- Depends upon the nature of records
- Ideally, remove majority of repeat records for each site (but this is laborious)

Hippocrepis comosa
(Horseshoe Vetch)
GB/ Wales: Least
Concern
Caernarvon: Rare

Format a printable version

- With two spreadsheets this can be automated (Access = database program)
- I can create a printable version in a few hours
- Can include maps (to replace tables for species with numerous sites)
- Could include occasional photographs if desired
- pdf or spreadsheet could be downloaded from BSBI website (county page)

How can we help?

- Advice on method – (keeping it simple)
- Extracting information from DDB
- Providing national information – Red Lists, National Status lists, Species Accounts?
- A second opinion for choices
- Formatting – converting spreadsheet to printable

Any questions?

- Thanks to
