dd. Styles 5; ovary 1-celled: fr. a 1-seeded utricle.....*Plumbaginaceae*, 757
 cc. Stamens as many as corolla-lobes and alternate or fewer.
 d. Corolla regular.
 E. Stamens as many as corolla-lobes.
 F. Ovaries 2, distinct, or 1 and deeply 4-lobed.
 g. Lvs. opposite: ovaries 2.
 H. Stamens distinct; carpels usually united at apex.....*Apocynaceae*, 797
 HH. Stamens united; carpels distinct.....*Asclepiadaceae*, 798
 cc. Lvs. alternate: ovary 1, deeply 4-lobed.....*Boraginaceae*, 800
FF. Ovary 1, not deeply 4-lobed.
 g. Stamens 4.
 H. Lvs. opposite.
 I. Petioles with stipules or connected by a stipular line: fr. a caps.
Loganiaceae, 793
 II. Petioles without stipules or stipular line: fr. a drupe or berry.
Verbenaceae, 802
 HH. Lvs. alternate, linear; corolla scarious.....*Plantaginaceae*, 823
 cc. Stamens 5: lvs. usually alternate.
 H. Stamens free from the corolla or between the corolla-lobes.
 I. Style present.
 j. Stamens free*Ericaceae*, 691
 jj. Stamens between the corolla-lobes: low caespitose or prostrate
 subshrubs*Diapensiaceae*, 755
 II. Style none: fr. a drupe.....*Aquifoliaceae*, 546
 HH. Stamens attached to the corolla-tube.
 I. Styles with 3 stigmas: fr. a caps.....*Polemoniaceae*, 800
 II. Styles with 2 stigmas or undivided.
 j. Fr. a 4-seeded drupe: fls. small, whitish, in large panicles.
Ehretia, 801
 jj. Fr. a many-seeded berry: fls. in cymes, fascicles or solitary.
Solanaceae, 812
EE. Stamens fewer than corolla-lobes: lvs. opposite.
 F. Fls. not in racemes; floral lvs. opposite: fr. a drupe or caps....*Oleaceae*, 765
FF. Fls. in terminal or axillary racemes; floral lvs. alternate: fr. a caps.
